

Pneumatic Hand Crimper & Decapper AP/CP2000

This is a true LIGHT-WEIGHT AIR-POWERED CRIMPER and DECAPPER designed and patented to make it easier than EVER BEFORE to crimp and decap vials and bottles.

In the past (and still available), hand-held air-powered / pneumatic crimpers were heavy tools. This was the best technology available due to basic physics that require a large air cylinder to generate the thrust required. At LPL, we have overcome this problem and patented the result. Our AP/CP2000 crimper and decapper weighs just 720 grams (1.5lbs) with standard heads and has more than enough thrust.

The fact that we have customers with multiple tools in operation speaks for itself.

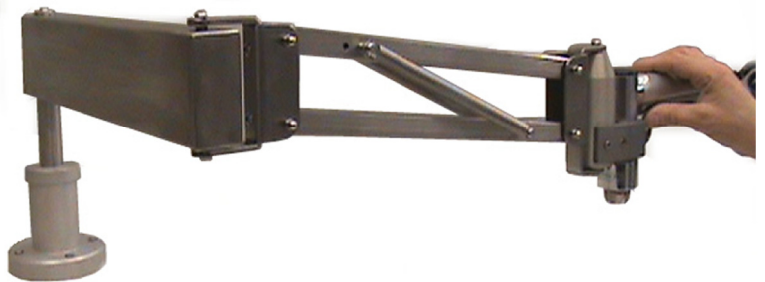

Optional Accessories:

Airtool Holder

Vertical Support Arm

Laboratory Precision Limited

30 Lanchester Way,
Royal Oak Industrial Estate,
